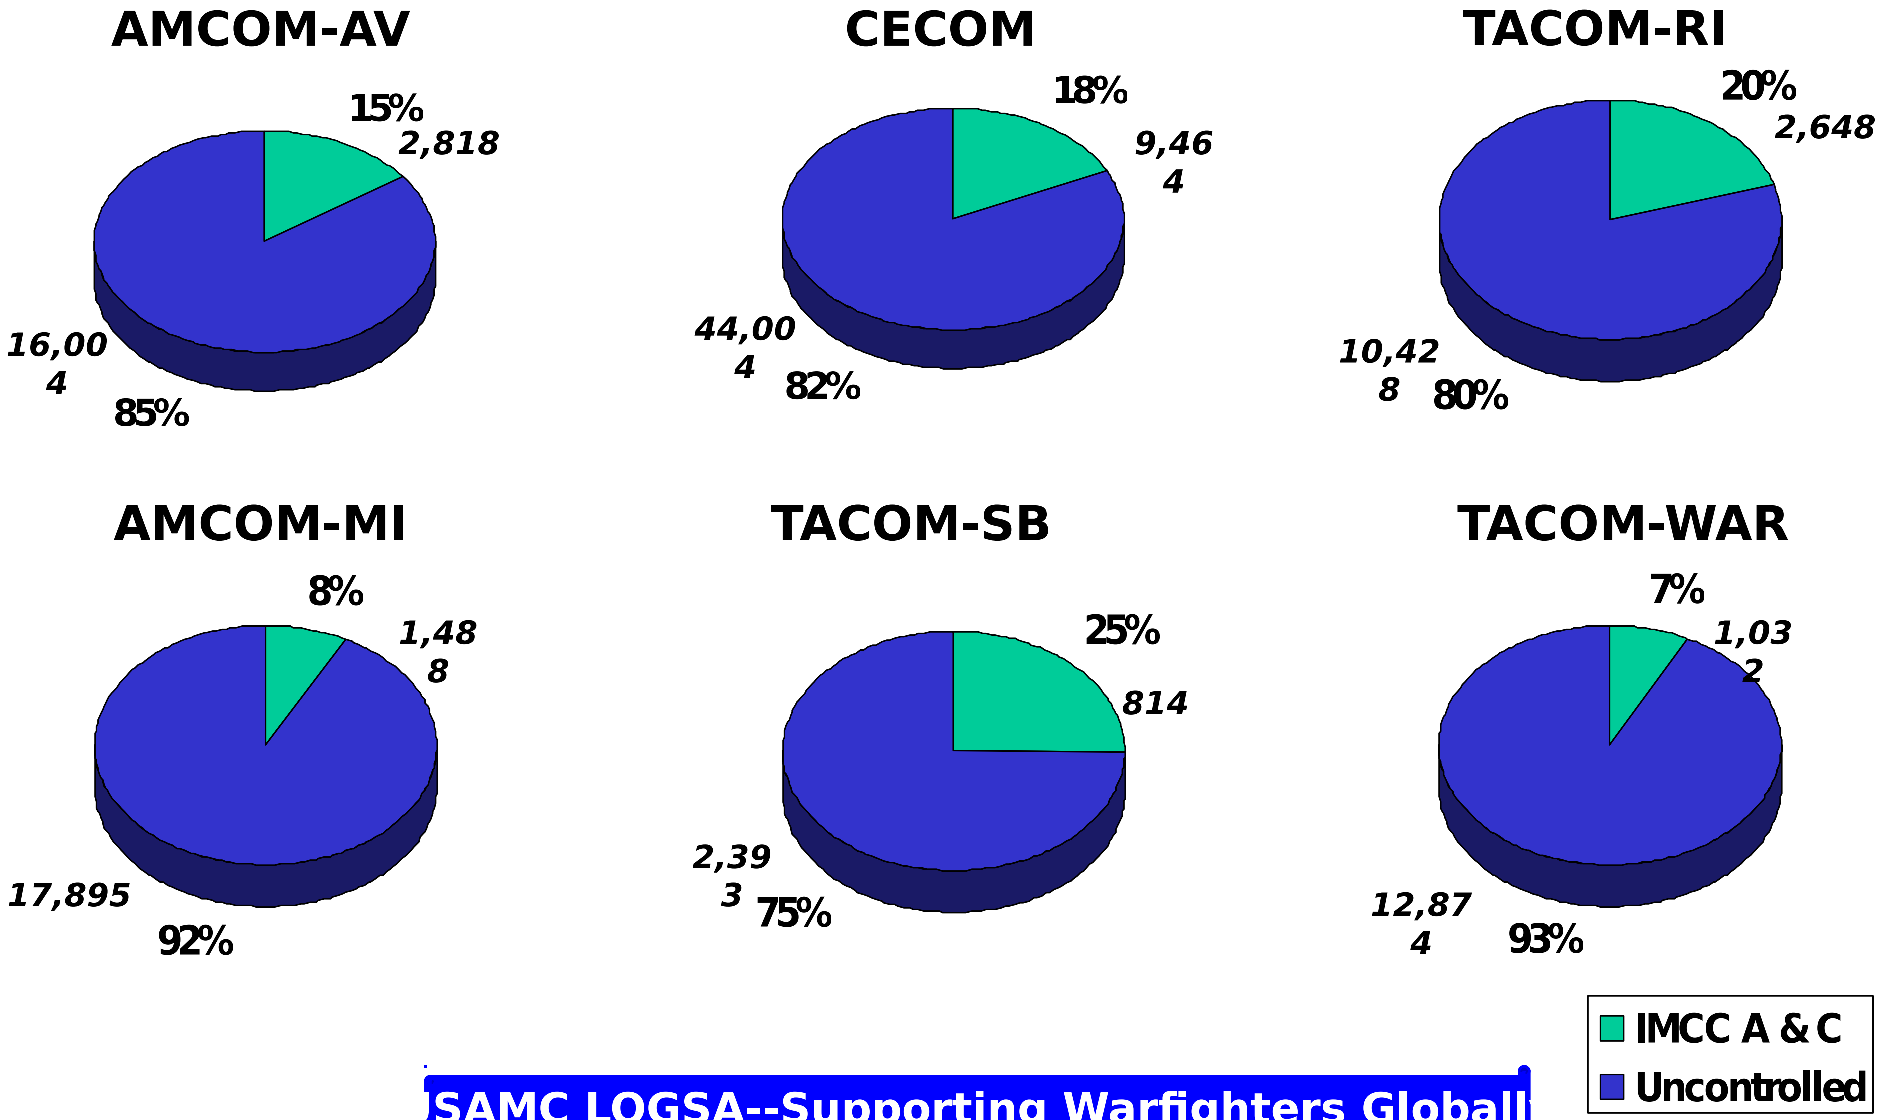
IMCC A and C vs. Online Processing Secondary Items Managed by ICP – Sep 04



Sep 04 data as of 01 Oct 04

Breakout of Controlled Items

	IMCC "A"	IMCC " C"
AMCOM-A	1,610	1,208
AMCOM-M	1,339	149
CECOM	8,930	534
TACOM-W	272	760
TACOM-R	2,146	502
TACOM-SB	664	150

IMCC "C" requisitions are run thru the Control Item Logic File (CLF). CLF is an IMMC tool that facilitates automatic processing. CLF completes processing for many "C" coded items based on parameters placed in the CLF, e.g., designated DODAACs, priorities, quantities, etc. Only requisitions not meeting CLF parameters will ever kick off-line for processing.
